

Role: CNC Machinist Assembly Operator

Burloak Technologies is a leading Additive Manufacturing company focused on delivering high quality engineered solutions. We have leading edge multi-axis machines and offer a work/ life balance. Due to our growth, we are looking to hire a CNC Machinist Assembly Operator.

Requirements

- Setup, operate and program CNC 3-4-5 Axis machines
- Read and interpret blue prints to determine dimensions, surface finishes and tolerances of finished work pieces
- Ability to make corrections and solve problems in order to maintain high quality.
- Verify dimensions of machined parts for accuracy and conformance using measuring instruments such as height gauges, micrometers, verniers, etc.
- Strive for continuous improvement
- Ability to read and implement assembly procedures

Qualifications

- Must have CNC operating and programming experience
- Minimum 3-5 years machining experience in a custom machine shop environment
- Fanuc 31*i* controls experience an asset
- Interest in learning and growing machining skills
